

AQUACEET PP

Water acidifier and disinfectant

Avoids
biofilm

MADE IN FRANCE

AQUACEET PP

POULTRY & PIG FARMS WATER DISINFECTANT & ACIDIFIER

INDICATIONS

AQUACEET PP **disinfects** water, **removes** scale and very significantly **slows down** biofilm growth. AQUACEET PP contributes **to avoid digestive problems**, by **acidifying** water.

AQUACEET PP helps animals **to put on weight** by :

- increasing water consumption
- improving appetite and digestion.
- Poultry faeces is drier = better comfort & better hygiene for poultry.

NORMS

Bactericidal according the norms **NFT 72-300** and **EN 1276**.

The components of **AQUACEET PP** are **authorized** for the treatment of the drinking water intend to human consumption.

Active ingredients **notified** according to the **European Directive for Biocidal Products 528/2012**.

Complies with the **European Union standards** for organic production (834/2007/EC and 889/2008/EC).

INSTRUCTIONS FOR USE

During breeding:

- Use AQUACEET PP in continuous injection with the help of a dosing pump or in a storage tank.
- Mix from 50 to 100 ml of AQUACEET PP for 1000 litres of water.
- The concentration is to be adapt in function of the desired and the initial pH and the hardness of water: see table hereafter.

In crawl space, without the animals:

- Drain totally the water circuit. After an eventual cleaning, fill in the watering system with a solution containing 1% of AQUACEET PP (1 litre for 100L of water).
- Let act 1 hour. Drain the circuit. Rinse carefully with clear water.

DO NOT CONSUME RINSE WATER TO THE ANIMALS.

CHARACTERISTICS

Aspect: Liquid (from colourless to clear yellow). Odour: Slight smell of phosphoric acid. pH at 1% in water: 1.7 - Density: 1.25 - Expiry: 18 months. Composition: Hydrogen Peroxide - Orthophosphoric Acid

PRESENTATION

Packing : cans of 5, 20 and 200 kg.
